

Hugo Onofri Bastit

Python and Full Stack MERN Developer

Work Experience

Making Sense (Mar del Plata) — Python Developer

2022 – July 2025

- Client: CCI - Puesto de Bolsa.
- Integrated **DocuSign** for electronic signature workflows to enhance document processing.
- Implemented **Auth0** for secure and scalable user authentication and authorization.
- Proficient in technologies like **FastAPI**, **SQLAlchemy**, **Alembic**, and **PostgreSQL**.

Achievements:

- Developed a **data migration Lambda** for transferring and initializing data seamlessly.
 - Created a **PDF summary retrieval Lambda** to fetch and download account summaries, storing them securely in **AWS S3**.
-

Freelance Projects

Instacheck – Full Stack Developer

January 2025 – Present

- Application for task management and control in companies, factories, or construction sites, focusing on operator activity tracking.
- Developed using **React Native**, **React + Next.js**, and **Kotlin** for backend services.
- Implemented **MongoDB** and **PostgreSQL** as main databases.
- Features include event creation, task control, and secure document storage.

E-commerce Website for Pharmacy Products

2023 (6 months)

- Designed and developed a responsive e-commerce platform using **ReactJS** and **CSS**.
- Built features such as product catalogs, shopping carts, and user-friendly payment flows.
- Collaborated closely with the client to ensure alignment with business objectives and user needs.

Achievements:

- Integrated **MercadoPago** as a secure payment solution for seamless transactions.

Website for an Educational Institute

2023–2024 (7 months)

- Developed a web application for managing courses and student information using **ReactJS** and **Bootstrap**.
- Enhanced functionality through dynamic forms and robust user authentication.
- Maintained and updated the platform regularly based on user feedback.

Achievements:

- Designed and implemented a **student registration system using NodeJS**, improving operational efficiency.

Skills

Technical Skills

- **Frontend:** HTML, CSS, Bootstrap, MUI, JavaScript, ReactJS, React Native, Next.js.
- **Backend:** NodeJS, Python, Flask, Django Rest Framework, FastAPI, Kotlin, SQLAlchemy, Alembic.
- **Programming Languages:** C, C++, Java, JavaScript, Python, Kotlin.

- **GraphQL:** Query design, schema implementation, API integration.
- **Databases:** MongoDB, PostgreSQL, SQL.
- **Tools:** Postman, GitHub, Git.
- **AWS:** S3, EC2, Serverless, AppSync, CloudWatch, Lambda, Secrets Manager, API Gateway, SQS.

AI Tooling & Orchestration: Claude Code with MCP servers, custom skills, and multi-agent systems for end-to-end product lifecycle — documentation, PRD creation, epic/dev-story analysis, and tech stack evaluation across frontend, backend, and AWS.

Soft Skills

- Positive leadership.
- Strong communication.
- Commitment and empathy.
- Pedagogical approach.
- Willingness to learn.

Education

- **UNMDP – Business Administration** – University degree, completed in 2020.
- **UNMDP – English Teaching** – University degree in progress.
- **Japanese Studies** – Language course completed.
- **MINDHUB – Full Stack MERN Developer** – Intensive 700+ hour bootcamp focused on Full Stack JavaScript with MERN stack.
